

SERVICES TO THE **LNG** INDUSTRY

TAILORED SOLUTIONS

Every project has its specific characteristics and all our clients have different needs. This necessitates the presentation and refining of our services to the specific technical and legislative requirements of our clients.

Our service offer exists of a well balanced mix of traditional inspections and added value services such as design verification, on-site technical support and maintenance management and support. Our experience extends to both LNG production plants as well as to receiving terminals.

REDUCING THE COMPLEXITY

Managing the complex combination of verification, inspection, testing and surveillance, while at the same time assuring safe working conditions, is a contemporary industrial challenge.

SGS offers a set of comprehensive services to help you reduce this complexity. SGS provides a total package solution for the LNG industry.

Our comprehensive set of services proves to add value to our customers
